The Foundation Module aims to build competencies in various functional areas to prepare you for your business studies. You will acquire the necessary knowledge and skills in mathematics, computing and statistics to form a strong pillar for your business calculations and planning. The economics subjects help you understand what the economy is about. The module lays an emphasis on helping you to develop your communication skills and develop your study and research skills which form an important building stone of your further studies. The Foundation Module is rigorous, academically demanding and designed specially to ensure that international students and Hungarian nationals gain the skills and knowledge to succeed in obtaining their high-quality degree.
